This class will explore this unsolved murder and its victim and suspects.

What do we know about the causes of autism? 2) Are vaccines safe, especially the COVID and measles vaccines? How are new vaccines tested? 3) Do artificial food dyes and ultra-processed foods harm our health? 4) Is raw (unpasteurized) milk safe or better than pasteurized milk for our health? 5) What's the evidence on the benefits and harms from fluoridation of water? 6) Do memory-strengthening supplements help protect us against dementia?
